Past performance is not a guide to future performance. The value of investments and the income from them can fall as well as rise and is not guaranteed. You may not get back the amount originally invested. Credit and fixed interest securities are the debts of governments and companies. These can be affected by changes in inflation and interest rates, for example if interest rates go up the value of the securities can go down, and vice versa. The value of the securities may fall if the issuer fails to repay the debit, fails to pay the interest or has their credit rating reduced.

The sector performance is shown for comparison purposes only. The MetLife Fund has a fixed duration that is significantly different to the sector average and this will be reflected in the overall fund performance.
