

# Beating back pain: A low back pain awareness campaign

**A toolkit for educating employees about  
preventing low back pain**

# A frustrating, painful ailment for employees and businesses

Low back pain is a very common health problem worldwide and a leading cause of disability — affecting performance at work and general well-being. It's the most common cause of time off work in the UK<sup>1</sup>, with around 10 million people living with the condition<sup>2</sup>.

Some back pain is the result of underlying medical conditions, while others have genetic origins. Other back troubles can result from poor posture, injuries from exercise and sports, too much sitting, a slip on the stairs or ice, or other types of injuries.

For many people, back pain can be debilitating and may recur or worsen over time.

That's why MetLife developed the Beating Back Pain campaign. It's an education and awareness campaign that may help employees to protect their backs and live more pain-free lives.

## What's in the toolkit?

This toolkit provides all the materials needed to deliver a successful campaign:

- Campaign objectives
- Suggested timeline
- Marketing materials (articles, email campaign, flyers, etc.)

### Campaign objectives

- Provide information to employees on the many causes of low back pain, with an emphasis on prevention
- Create greater awareness of the importance of protecting the back, and the many lifestyle changes that employees can make to help keep their backs healthy and strong
- Provide information about treatment options, including non-invasive therapy options.

### Suggested timeline

The campaign is designed to last a minimum of three weeks but can be extended to six weeks. The emails are core items of the campaign, as sending these out may increase employee engagement.

**Week 1:** Protecting your back from injury

**Week 2:** Ouch! What's causing my back pain?

**Week 3:** Back pain treatment myths

### Marketing materials

#### 1. Email campaign

- Banner
- Email templates

#### 2. Flyers

- Managing low back pain: Treatment options
- The importance of protecting your back

#### 3. Short articles

- Protecting your back
- Underlying conditions that may cause back pain
